

SAINT ANN'S SCHOOL

Vincent Tompkins
Head of School

November 2017

Dear Parents,

As we enter the final stages of our construction project in the Bosworth Building (129 Pierrepont St.), I want to share with you our most recent update from our construction team on the remaining months of the project. We now anticipate being able to occupy our newly renovated space in the subcellar, undercroft, and much of the first floor when we return from our February vacation. This will allow us to bring back into the Bosworth Building some of the classes and activities that are currently housed in swing spaces outside of the building. It also means that we will be able to begin using the newly renovated main entrance and entrance lobby on Pierrepont St.

While we are doing everything we can to advance the work on the second and third floors, our best estimate of when we will be able to occupy those spaces is now early May. This work includes the new cafeteria, kitchen, High School offices, the Red Stairs, and the Ettl Lobby.

As always, we will continue to take steps—working with our security staff, contractors and division heads—to ensure the safety of our students while construction continues. You can learn more about the project by visiting the facilities section of our website. And I will send further updates if there are any major changes to these anticipated completion dates.

Yours,
